# RETO 9 – Consultas API

## RETO 9:

La API gratuita REST Countries (<https://restcountries.eu>) tiene configurados las URI para el GET de cada uno de los siguientes endpoints:

```
https://restcountries.eu/rest/v2/all
https://restcountries.eu/rest/v2/name/{name}
https://restcountries.eu/rest/v2/name/{name}?fullText=true
https://restcountries.eu/rest/v2/alpha/{code}
https://restcountries.eu/rest/v2/alpha?codes={code};{code};{code}
https://restcountries.eu/rest/v2/currency/{currency}
https://restcountries.eu/rest/v2/lang/{et}
https://restcountries.eu/rest/v2/capital/{capital}
https://restcountries.eu/rest/v2/callingcode/{callingcode}
https://restcountries.eu/rest/v2/region/{region}
https://restcountries.eu/rest/v2/regionalbloc/{regionalbloc}
https://restcountries.eu/rest/v2/{service}?fields={field};{field};{field}
```

Sobre la API REST Countries realiza una consulta GET válida para cada uno de los end-points anteriores. Utiliza para ello la aplicación cliente POSTMAN. Recuerda adjuntar en un .txt las consultas y el JSON obtenido.
